### Personal :

Birth 23 May 1952, Tel Aviv, Israel

As the director of the science museum, Maya is involved and initiates programmes to foster scientific culture within the general public from all ages and sectors of the Israeli society and to promote science education in Israel, connecting informal and formal science education. She initiated strategic programs with the Jerusalem Municipality and with the Ministry of Education to promote and develop the infrastructure for science education ecosystem. She is active in the international science museums organizations, she builds cooperation with science museums in Europe and in North America. Under her leadership the museum takes part, initiates and leads various projects with the European Commission support in science communication and science education. Last year she won the Beacon of the Year Award, from ECSITE – the European Network of science centers & museums for her personal embodiment of the network's values.
