## REGLEMENTARI EDILITARE

DATA: decembrie 2023

The PUZ object is made up exclusively of the parcels contained within the limit of the area proposed for regulation by the PUZ.  
In the studied area, an illustrative variant of urban development was proposed. This urban planning option is purely informative, not having the character of urban regulation.

The geometric characteristics and layout conditions of the proposed building networks, as well as the location and configuration of the technical-building arrangements and constructions regulated by this PUZ, will be established in accordance with the legislation and norms in force, depending on the conditions existing on the land at the time of the execution of new works, modernization and/or rehabilitation of the technical building infrastructure.
